MOUNT TABOR JOINS MICROSOFT HEALTHVAULT CONSULTANTS DIRECTORY

Health IT Company Provides Consulting and Development Expertise for Partners Developing Applications and Services for the HealthVault Platform

Portland, Oregon – May 13, 2009 – Mount Tabor Online Services, Inc., a privately held information and development company, announced today collaboration with Microsoft as a development and consulting service partner for HealthVault.

With this announcement, Mount Tabor is the first organization to be featured in the Consultants Directory for both [Microsoft HealthVault](#) and [Google Health](#).

"We're extremely excited to be part of the HealthVault community," said John Hall, co-founder and Chief Technology Officer for Mount Tabor. "HealthVault provides a safe and secure platform for health care information exchange. By providing consumers with more access to their health care data, HealthVault enables consumers to better manage their health and wellness, facilitating communication between consumers and their health care providers."

Mount Tabor provides specialty consulting and development services for third-parties wishing to integrate with the Microsoft HealthVault platform. Mount Tabor specifically supports current and potential HealthVault partners in the areas of data normalization, data exchange, and strategic guidance related to application development, integration, deployment and operation.

Microsoft HealthVault is available for free on the web at <http://www.healthvault.com>

About Mount Tabor
